Viton B70 seal option for 4" Butterfly Valves

Dear Valued Distributors,

As part of Liquip's continuous efforts to ensure our products are aligned with market requirements, we have added a 4" Butterfly valve with bonded Viton B70 seal to our LBV450 series product line.

The LBV450 series is a full flow hand operated or position locked butterfly valve. These valves control flow of product through pipelines fitted with 100mm (4") TTMA flanges.

The LBV450 provides a cost effective solution for applications requiring a butterfly valve that can operate between -10°C to +100°C.

The LBV450 holds the exact same physical specifications as the LBV450VG except for the main seal.

The LBV450 will be available for dispatch in December 2017 and will retail at a list price of AUD\$380. At this price point, the LBV450 is a competitive solution.

Liquip still offer the LBV450VG to suit required applications.

LBV450 - 4" Butterfly Valve with Bonded Viton B70 seal.

Ordering Information

Viton B70 options
