

## The SWIFT Delivers Advanced Measuring Technology and Accurate Results.

Liquip's SWIFT Delivery System is changing the way fuel deliveries are being made thanks to the most simple, yet technically advanced metering delivery system available on the market. The all-new SWIFT is noticeably lighter than conventional pumping systems, offering increased payload capacity. Backed by over 50 years of innovation, the SWIFT system is the **simplest, lightest, smartest** and **fastest** solution on the market today.

### Features & Benefits

- Metered deliveries: gravity, bulk and hose reel
- Bulk discharge not restricted by metering equipment; over **1,000 L/min (364 GPM)\***
- **Metered Pumping and Tank gauging** in a combined unit
- Preset volumes for **gravity, bulk and hose reel** discharges
- **Meets Australian NMI and AS2809 requirements**
- Large digit LED display optional
- One-touch level gauging of all compartments
- Operator's are already **familiar** with Liquip components helping them embrace new technology
- Clear prompts for **easier and quicker training** of new or existing drivers
- **Reduced complexity and maintenance** especially in regional areas
- **Proven** and trusted components with **national** parts availability and **service support**
- Incredible reliability means less downtime and the **lowest whole-of-life-value cost**
- Calibration settings permanently stored in the DFV and can be externally backed up or uploaded at a later date
- Monitor level safely from ground
- **Hazardous area approved** for Zone 1 (IECEX)

\*Optional upgrade

†Liquip's recommended pump is rated at 1,015 LPM
